How to Check for Updates to Windows App VDI

Introduction

Process details how existing Agents can check for any updates needed to their Windows App application.

Details

Checking for application updates will vary depending on the type of PC or domain/build of the PC.

Agents Using Bring Your Own Device (BYOD) PCs

- 1. Open the Microsoft Store.
- 2. Click on the **Library** button in the **lower left corner**.

 If the Windows App requires an update, it will be listed at the top of the page and have the Update button next to it. If you don't see any applications requiring an update, click on the Get Updates button next to Updates & downloads.
