# Security Key Setup

Introduction

Some accounts may require additional authentication. Process details on how to set up a security key.

Details

1. Navigate to https://go.qualfon.com/mfa on your **computer's web browser** (MS Edge, Chrome, etc).

2. Enter your **Qualfon email address** on the **Microsoft login** screen. Click on **Next**.

3. Enter your **Password** on the next screen and click **Sign in**.

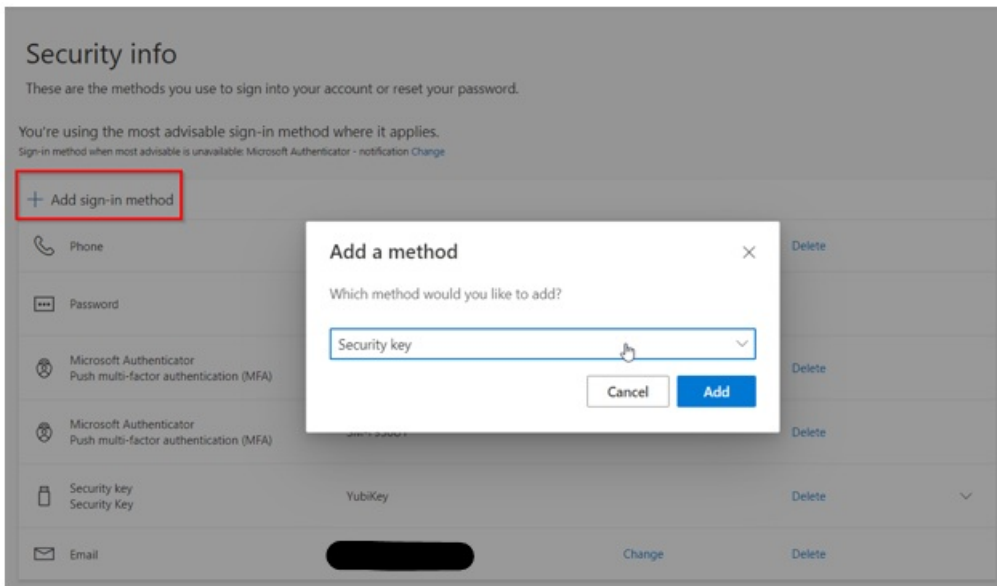

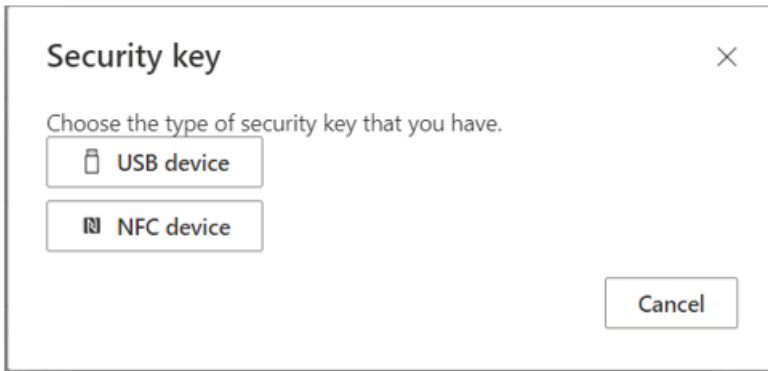

4. Under the **Security Info** screen, click on **+ Add sign-in method** and **Security Key**. Click **Add**.

5. Choose the connection type of **USB Device**.

6. Follow the prompts and select **Security Key.**

7. Click on **OK**.

8. Click on **OK** again.

9. Enter a **password** (used every time), then tap the **security key** when prompted. Now your security key is set up for 2 Factor Authentication (2FA).
