Security Key Setup

Introduction

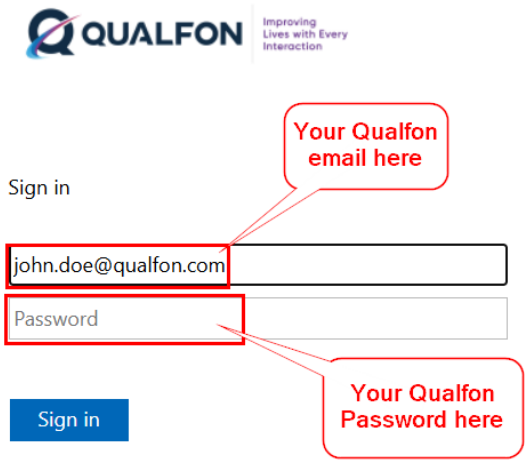

Some accounts may require additional authentication. This process outlines how to set up a security key.

Details

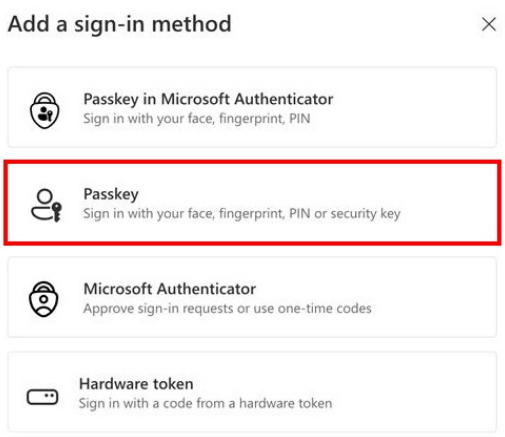

1. Navigate to https://go.qualfon.com/mfa on your **computer's web browser** (MS Edge, Chrome, etc).
2. Enter **your Qualfon email address** on the **Microsoft login** screen. Click **Next**.

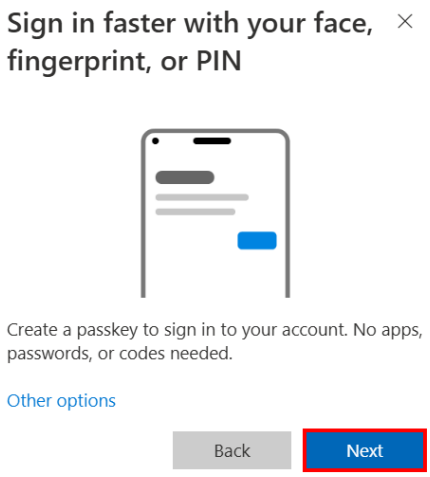

3. Enter your **Password** on the next screen and click **Sign in**.

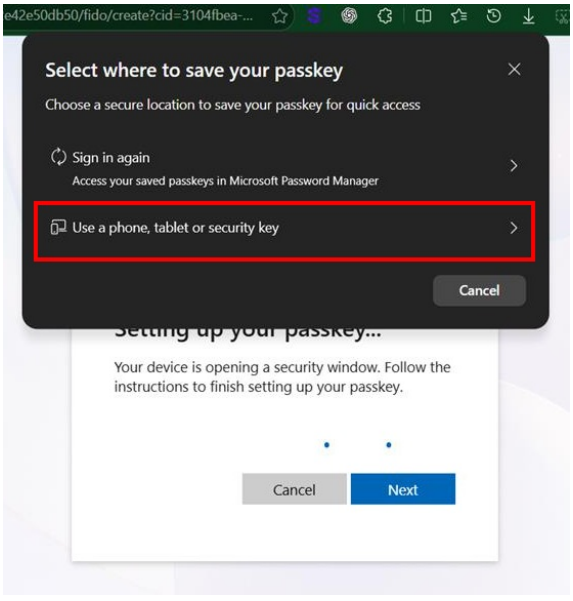

4. Under the **Security Info** screen, click **+ Add sign-in method,** then **Passkey**. Click **Add**.

5. Click **Next**.

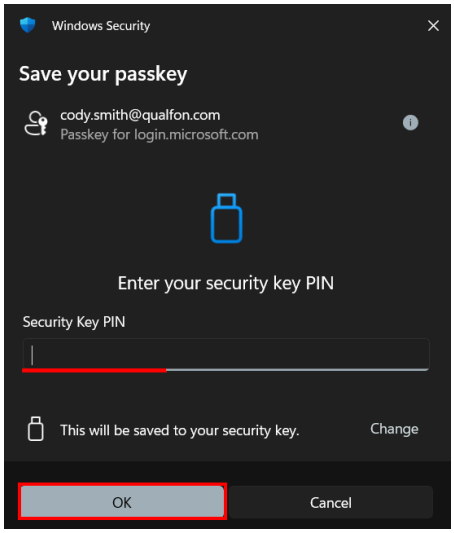

6. Select the option for **Security Key.**

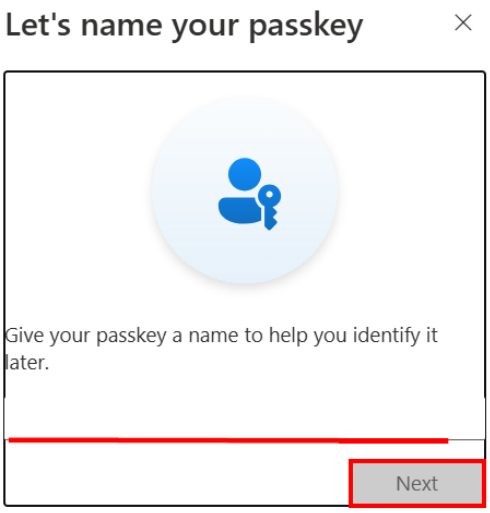

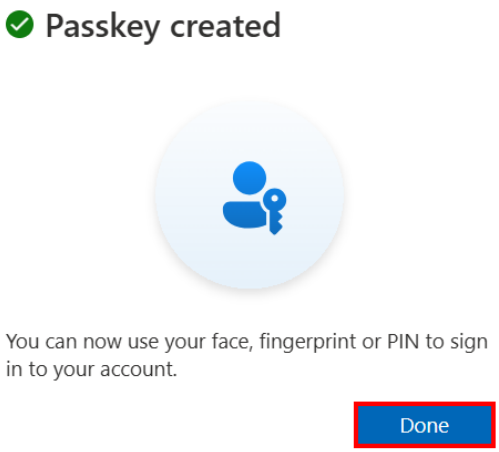

7. Enter a **PIN #**, touch the **security key** & click **OK** to save it.

8. Enter a **name** for your **Passkey**. For example: Feitian Key. Click **Next**.

9. Click **Done**.
